Pumptronics LPG Dispensers

Pumptronics now manufacture a choice of seven LPG models, all of which have been designed and developed by ourselves in the UK and come housed in the same rust-free solid stainless steel cabinets used throughout the Pumptronics range.

ACCURATE

Aside from safety which is paramount, the first aim when designing these units was the accuracy of measure. This has been achieved by using a vapour separator and dual piston meter and technologies which maintain the LPG in liquid phase under varying conditions. All the Pumptronics LPG dispensers are therefore suitable for the re-sale of LPG.

FAST

The second aim was dispensing speed, to ensure that the dispenser did not constrain the flow-rate being generated from the tank. By using correctly sized, quality valves, fittings and pipework, LPG can flow through the Pumptronics dispensers at a rate of over 50LPM.

LOW MAINTENANCE

The final aim was that the units were practical and maintainable under normal site conditions. Each section of the dispenser is therefore able to be isolated and drained to allow parts to be removed as necessary. The pipework also includes a nozzle attachment point to enable product to be circulated back to the tank for testing purposes – invaluable when there is no LPG vehicle available and for standard measure checks.

COMPATIBILITY

The same selection of self-service and fuel monitoring interfaces supported by other Pumptronics equipment are also available for LPG dispensers and have the necessary Weights & Measures certification.

In addition we now offer the NEW DUAL FUEL dispenser.

With LPG vehicles also needing to re-fuel with Unleaded, this combined fuel dispenser, allows motorists to fuel with both grades without moving their vehicle – a facility that will be greatly welcomed by dual fuel drivers.

Manufacturers of Fuel Dispensing Equipment

Retail LPG Dispensers

SINGLE HOSE RETAIL LPG DISPENSER With electronic cash computing display Model No: LPG11SR

- Single grade
- Single hose with hose retriever (single user)
- Single illuminated cash computing LCD display (second side display optional)
- Single deadmans button
- Infra red management control functions
- Interface to self-service equipment
- Can be island mounted or skid mounted
- Hose can be mounted under display for skid assemblies

Also available
SINGLE HOSE COMMERCIAL LPG DISPENSER
With electronic volume only display
Model No: LPG11SC

Commercial LPG Dispensers

SINGLE HOSE MECHANICAL LPG DISPENSER With mechanical volume only display Model No: LPG11MC

- Single grade
- Single hose (single user)
- Single mechanical volume only register
- Can be island mounted or skid mounted
- Optional 10PPL interface (No deadmans button facility supplied)

TWIN HOSE RETAIL LPG DISPENSER With electronic cash computing display Model No: LPG12SR

- Single grade
- Two hoses with hose retrievers (two users simultaneously)
- Two illuminated cash computing LCD displays
- Two deadmans buttons
- Infra red management control functions
- Interface to self-service equipment
- For island mounting

Also available
TWIN HOSE COMMERCIAL LPG DISPENSER
With electronic volume only display
Model No: LPG12SC

Standard Features

- Complete structure and cladding from solid stainless steel to completely eliminate corrosion
- Vapour eliminator & filter assembly
- Dual piston meter with typically +/- 0.5% accuracy and 0.2% repeatability
- Electronic and mechanical overspeed and non-venting expansion protection
- Test port and isolation valves & drains for ease of calibration and maintenance
- Hose and bayonet or acme latch-on nozzle
- Breakaway hose coupling
- Integral hose locking – no padlocks required
- Deadmans button
- 1" illuminated displays
- Choice of self-service or fuel management interfaces
- Management functions dependent on model type
- 12 months warranty
(Some features not offered with mechanical model)

DUAL FUEL TWIN HOSE RETAIL LPG DISPENSER With electronic cash computing display Model No: LPG22DFR

- Two grades (LPG and Unleaded/Other)
- Two hoses with hose retrievers (two users simultaneously)
- Four illuminated cash computing LCD displays (both grades available both sides)
- One deadmans button (for LPG side)
- Infra red management control functions
- Interface to self-service equipment
- For island mounting

Also available
DUAL FUEL TWIN HOSE COMMERCIAL LPG DISPENSER
With electronic volume only display
Model No: LPG22DFC

Options

- Breakaway couplings suitable for re-assembly under pressure
- Built-in hose retriever – fitted as standard on retail machines
- Second side display – fitted as standard on Twin units
- Stainless steel under pump plinth
- Galvanised steel mounting stool
- Initial on site commissioning
