

Minelec Diesel Range

The Minelec diesel pumps are available in versions to meet almost every need of the commercial vehicle operator. Its small size means it is ideal for locating within the end cabinet or banded area of a tank pack.

With the entire cabinet being fabricated from solid stainless steel, the Minelec can withstand the roughest, toughest environment and the electronics allow communication with fuel monitoring or wet stock reconciliation systems without additional costs.

Featuring a 2" high illuminated display as standard, the Minelec truly stands out from the crowd.

Available in versions for Weights & Measures re-sale or for non re-sale use, the Minelec is the ultimate of diesel dispensers.

Minelec Diesel Pump

Model Range

Full details of models available are shown overleaf.

Standard Features

Suitable for use with diesel fuels only, and with below or above ground storage (see model selector overleaf).

Features which are part of the standard package include:

- Solid stainless steel construction
- Weights & Measures approval (selected models only)
